Statement of Work

Firing Range Service - Detroit Field Office

The Department of Homeland Security (DHS) has a requirement for a firearms outdoor range to conduct mandatory quarterly qualifications and other firearms training. NOTE: THE RANGE MUST BE AN ESTABLSIHED RANGE; THIS IS NOT A REQUEST TO BUILD A RANGE. The range shall be within a 20-mile radius of the Detroit Metropolitan Airport. The proposed range must meet the following standards to qualify for consideration:

The range must comply with applicable, local, state and federal regulations, including but not limited to, lead exposure. Vendor MUST submit its most recent certification of lead exposure testing and/or its most current OSHA compliance certificate/letter and air sample for lead with submission of proposal. Failure to submit will result in an incomplete proposal.

If an award is granted and OSHA standards are not in accordance with regulation, the government has the unilateral right to terminate contract at any time via written signed modification.

The following OSHA programs are applicable:

Lead:

• 29 Code of Federal Regulations (CFR) 1910.1000, Air contaminants

http://www.gpo.gov/fdsys/pkg/CFR-2014-title29-vol6/pdf/CFR-2014-title29-vol6-sec1910-1000.pdf

• 29 CFR 1910.1025

Signs and tags:

Section 1910.145

https://www.osha.gov/Reduction_Act/TAGS-SUP.html

- The proposed range must meet the following standards to qualify for consideration:
- DHS will provide all AMMUNITION, TARGETS and FIREARMS INSTRUCTORS. The range time must be available exclusively to the Department of Homeland Security (DHS) during the hours indicated.

- Signal for cellular phone service must be adequate or if signal cannot be obtained landline must be installed for emergency calling.
- Warning signs will be in accordance with OSHA standard section 1910.145.
- Range access roads must approach the range complex outside the SDZ footprint.
- Roads and parking will be accessible by passenger vehicle, light or medium trucks, and vans.
- Parking lot will be able to accommodate a minimum of 20 vehicles and in compliance with Americans with Disabilities Act (ADA) accessible parking spaces table.
- The range must be able to accommodate 20 shooters. Each shooter will fire approximately 250 rounds per day.
- The range shall be capable of allowing leaded ammunition fire. The range owner will be responsible for lead recovery at the range.
- The range shall have firing lanes up to 50 yards long.
- The range rules cannot disallow movement between firing points or restrict movement-oriented firearms firing points training by students (i.e. standing to kneeling transitions).
- The range rules cannot disallow students from drawing and firing from the holster.
- The range rules cannot disallow a student from moving in front of the firing points with an instructor present (i.e. tactical move and shoot type drills where instructor/student ratio would be too restrictive) The range must possess moveable barricades for the 25 and 15-yard line course of fire.
- The range most have target stands available to accommodate paper and cardboard DHS Transitional II targets.
- DHS personnel will use the range an average of 18 days per year (3 days X 6 months = 18 days per year/from April 15th to October 30th) with an estimated 20 shooters per day. The estimated number of rounds fired per year is 90,000 (based on 20 shooters per day X 250 rounds per shooter X 18 days). The range must be closed to the public during the corresponding hours. Under this contract, DHS requires exclusive use of the range in 8 hour blocks. This does not include weekends and federal holidays.

Proposed Site Inspection

- As part of the proposal evaluation process, TSA reserves the right to inspect all proposed sites to ensure compliance with all requirements set forth above.
