SPECIFICATION SHEET

Title: 3-Ton Orchard Spreader

Purchase Point of Contact: Allyne Askins, 843/335-6023, allyne_askins@fws.gov

Technical Point of Contact: Patrick McCaskill, 843/917-7596, Patrick_mccasill@fws.gov

Ship-To: Carolina Sandhills National Wildlife Refuge, 23734 Highway 1, McBee, SC 29101

Item Description:

The **3-Ton Orchard Spreader** is a heavy-duty agricultural implement designed for high-efficiency distribution of lime, fertilizer, and soil amendments across managed fields. Its large-capacity hopper enables extended application with fewer refills, while adjustable gate and spread-pattern controls allow the operator to regulate material output for precise, uniform coverage. Constructed with a durable steel frame and corrosion-resistant components, the spreader is built to withstand rugged field conditions. Wide flotation tires minimize soil compaction and provide stable operation on uneven terrain, and the standard hitch system ensures easy attachment to tractors and utility vehicles.

Specifications:

Stainless Steel Hopper

16-inch stainless steel mesh chain

19 x 16.1 tires

Press wheel drive on conveyor

Hydraulic cylinder engagement on press wheel

Steel cleated press wheel

2 inch rear roller and 1-1/2-inch front roller shaft

Safety chains

Plug to tractor

Stainless steel roller chain

Stainless steel spinners assembly including shafts, hubs, bearing mount, and spread shield.
