Questions and Government Response:

1. **Question:** Will the Government please specify how proposals are to be submitted?

   Answer: Submit all offers/quotations to Nicholas Ruppert, Contract Specialist at Nicholas.Ruppert@deca.mil, and Daniel Ellis, Contracting Officer at Daniel.Ellis@deca.mil by the date and time specified in the SF1449.

2. **Question:** Will the Government please specify PoP to use for pricing?

   Answer: Base Year: 15 September 2026 to14 September 2026 (365 Days)
   Option Year 1: 15 September 2027 to 14 September 2028 (365 Days)
   Option Year 2: 15 September 2028 to 14 September 2029 (365 Days)
   See Deliveries or Performance section found on page 18 -19 of 54 for more information.

3. **Question:** Can the government provide a more detailed inventory list that includes model numbers, serial numbers, etc.? For example; "Forklift" appears on the inventory list, what drive type is the forklift, load capacity, current number of operating hours the forklift has experienced?

   Answer: Each inventory item listed in Annex C has most of this information including: Manufacturer name, model number, serial number, and year purchased. More information can be found by searching the maker/model or check the device. For the forklifts, I quickly found motor and capacity.

	Maker	Model	serial number	motor	capacity	year purchased
Forklift	Still	R 70-20 i	517065304652	Diesel	3000kg	2004
Forklift	Still	RX 50-15	515065D00428	Electric	1500kg	2013
Forklift	Still	R 70 - 20	517065304647	Diesel	2000kg	2004
Forklift	Crown	SCT 6000	10027734	Electric	2000kg	2017
Forklift	Still	RXE 15	515515N00021	Electric	1500kg	2024

The exact number of hours, is currently unknown. Each machine would have to checked for its current hour meter standing.

4. **Question:** Can the government provide more details about the facility, such as total area of the facility, how many square feet of roofing, how many gutters and downspouts, etc.?

   Answer: See “site plan” provided with solicitation, second slide**.** The store has 61,480 ft2 (5,712 m2) of floor space with slightly more roof space. There are no gutters on the main roof, but has drains and downpipes which go through the roof to the drain line under the building. The is about 12 of these drains. (We use the inventory item “gutters and downspouts” for these roof drains in Wiesbaden.)
