Statement of Work

Provide Mojave Desert Native Seed for Post-Fire Emergency Stabilization, Mine and Energy Development Site Reclamation, and Combating Invasive Species

1.1 Introduction – The Bureau of Land Management (BLM) has a long-term need to supply native plant materials for federal land management rehabilitation, soil stabilization, and reclamation efforts across the Mojave Desert ecoregion. Common uses for native seeds include soil stabilization and reclamation of mining and energy development sites, post-fire seeding for soil stabilization and to combat invasive species, fuels management efforts to replace fire-prone invasive annual grasses with more fire-resistant and fire-resilient plant species, and recovery of Federally listed species. Increasing Mojave-appropriate seed supports Secretarial Order 3417 Addressing the National Energy Emergency, Secretarial Order 3418 Unleashing American Energy, Executive Order 14154 Unleashing American Energy, and Executive Order 14156 Declaring a National Energy Emergency. Also, the National Seed Strategy (2015) Goal 1 is to ensure the reliable availability of genetically appropriate seeds. This pilot seed increase contract provides Financial Instruments for the commercial agricultural industry to help meet BLM seed needs in support of National, Departmental, and Bureau priorities. Anticipated seed production will vary by species, with estimated production of 15-100 pounds of raw seed per each 1/10 acre in cultivation.

1.2 Scope – The object of this contract is dual:

1. To procure source-identified seed, increasing seed originating from wildland collected seed sources into larger quantities required for stabilization, reclamation, and rehabilitation projects on federal lands. Seed ordered under this contract will be used on federal lands within the Mojave Desert ecoregion. All seed delivered to the Government shall be delivered to the Mojave Desert Ecoregional Native Plant Coordinator in Palm Springs, CA. Full seed cleaning shall not be required of the grower, but delivered seed shall have all stem material greater than 4 inches in length removed and seed shall be pre-treated with No Pest strips (or equivalent) to remove any potential insects.

2. To increase ecoregional seed amplification capacity to meet continuing and future Mojave Desert seed needs for post-fire emergency stabilization, invasive species and fuels management, and reclamation of mining and energy development sites. Preference will be given to seed producers under this contract who are located within the geographic boundaries of the Omernik Level III Mojave Basin and Range Ecoregion or Sonoran Basin and Range Ecoregion (https://www.epa.gov/eco-research/level-iii-and-iv-ecoregions-continental-united-states) to better match seed source conditions and seed increase field conditions. However, award will not be restricted to producers within these ecoregions. Priorities for award shall be as follows:

1. Sites located within the Mojave Basin and Range Level III Ecoregion.

2. Sites located within the Sonoran Level III Ecoregion.

3. Sites located within the Southern California/Northern Baja Coast Level III Ecoregion OR sites within the Chihuahuan Deserts Level III Ecoregion

4.Sites located outside the above ecoregions.

The Contractor shall provide all acreage, labor, supervision, equipment, tools, materials, supplies, facilities, fees, seed certification, records, and transportation necessary to cultivate and produce cleaned and tested native seed that meets crop and seed contract quality and quantity standards from requested species. This includes all field application and seed crop certification fees. A fully implemented irrigation system will be required. Payment will be structured to provide for a field establishment payment, followed by annual harvest payments.

The Seed Increase Price Sheet identifies species, source seed transfer zones, amount of available starter seed, and maximum target acreages for seed increase fields. Vendors may quote on field sizes of 0.1 acre up to the maximum target acreage for each species and seed transfer zone combination of interest. This sheet shall be used by the contractor to quote on species by seed transfer zone which they are interested in growing.

The Government will provide SI stock seed for seed increase to meet target field size stated, with the seed analysis report for the seed lot, to the grower prior to sowing for the sowing year. The seed analysis report includes: 1) species, germplasm identification term, source location by County and Provisional Seed Transfer Zone, year of collection, seed generation (G0), 2) seed viability, seed fill rate, and pure seed content, and 3) year tested. Government furnished seed will be provided to the grower within 30 days of the grower's request for seed delivery.

The Contractor shall provide all acreage, labor, supervision, equipment, tools, materials, supplies, facilities, fees, laboratory tests, seed certification, records, and transportation necessary to collect, cultivate and produce cleaned and tested native seed that meet crop and seed contract quality and quantity standards from species listed in the delivery orders. This includes all field application, seed crop certification and seed testing fees. A fully implemented irrigation system shall be required.

These are small-scale pilot seed increase projects, of 1/10 to 1 acre in size. All seed produced shall be delivered to and be owned by the BLM.

CONFIDENTIALITY: The information developed under this contract is the property of the U.S. government and shall be kept in strict confidence.

PERFORMANCE PERIOD: The work of this base contract shall be provided from approximately September 1, 2026, through December 31, 2030. The performance period for annual species shall be for two years (one field prep year plus one production year), while the

performance period for perennial species shall be four years (one field prep year plus three production years).

1.3 SEED PRODUCTION SPECIFICATIONS AND DELIVERY STANDARDS

A. BLM shall provide the specified quantity of seed to the Contractor to start the contracted production acreage for each contracted species/seed transfer zone. It is OPTIONAL for Contractor to start each of the fields through direct plug planting. If plugs are chosen, fields shall be directly planted with a typical target of 20,000 plugs per acre, with the final number determined by the quantity of plugs that are produced by the nursery and cultivation practices of the farm. Production costs will reflect the number of plugs planted per acre. Produced seed shall be delivered to the Mojave Desert Ecoregional Native Plant Coordinator in Palm Springs, CA. It does not need to be fully cleaned or tested, but all stem material greater than 4 inches in length shall be removed and all seed shall be treated with No Pest strips prior to shipping.

B. The seed lot and germplasm identity shall be maintained throughout all phases of the contract. The seed lot identity and nomenclature shall not be lost, mixed, or contaminated with other seed from other sources.

C. The Contractor shall grow out seeds of native plant species following appropriate and sanitary nursery best management practices, and in a way to prevent potential hybridization of species (seed fields must be isolated from any other varieties or accessions of the same species, and from wild populations of the same species growing in the vicinity of the fields, by at least 300 feet).

D. All seed production fields shall be inspected annually by the Contractor, COR and/or other BLM designated PI for 1) confirmation the agreed upon native species are being grown, 2) documenting the health/reproduction potential of the crops, 3) documenting all non-native or non-target species in the fields and their associated cover. The COR and/or BLM designated PI shall have experience identifying the native species being grown and any non-native species that could occur in the fields.

E. The Contractor shall provide a brief annual summary report (with at least two photos per field/species) summarizing the production and seed test results for all species grown for this project on and/or before May 1st of each year.

F. Field Maintenance and Harvest: The Contractor shall manage these native seed production fields by providing fertilization (if needed), weed control, and irrigation for the species at optimal time periods. Seed shall be harvested at maximum maturation time for maximum seed production.

G. All seed shall be cleaned to the extent that no stems or debris longer than 4 inches remain. Seed shall be treated with No Pest strips to ensure it has no insect infestations.

H. Ownership: All seed produced from BLM provided starter seed during the Period of Performance of this contract is the property of the BLM. Following the contract conclusion, if the Contractor chooses to retain perennial species plants in their fields, seed produced after the contract Period of Performance becomes property of the Contractor and may be sold through the commercial native seed marketplace.

I. General Limitations: The Contractor agrees to grow G0 seed stock for increase and provide BLM G1 stock. No further generations are allowed unless approved by the BLM.

J. Volunteer Plants: Every reasonable effort must be made to control volunteer plants (arising from seed or vegetative remnants). The Contractor shall identify all non-target species growing in the fields and provide this information to the BLM. Fields may be inspected by BLM.

K. Harvest: Identity and purity of seed must be maintained at all times during the harvest. Equipment and facilities used for transporting, handling, and storing of seed may be inspected by BLM.

L. Seed Storage: Seed shall not be allowed to become wet after harvest. Seed shall be dried and stored in a building, shed, or warehouse that allows air circulation and is protected from rain, moisture, temperature extremes, and rodents, insect, and pathogen attack, or other conditions that would reduce the viability of the seed.

M. Target Seed Standards: The following general target standards shall apply to all seed increased. Note that these are standards to strive to achieve. The Contractor shall still be reimbursed for production even if targets are not met, unless negligence of the production fields is observed.

N. Packaging and Marking:

   a. All seed shall be delivered in sound, clean, and made from standard poly or woven sacks of similar strength and characteristics. Burlap bags will not be accepted.
   b. The weight of the actual bags shall not be included in the stated weight of the seed delivered.
   c. The lot number for all seed shall be marked on the bag (stenciled or marked with indelible ink). The lot number shall consist of the original starter seed lot, plus the generation, producer code provided by BLM, and year of production. EXAMPLE: “ACHY-SOS-CA930A-120-SANBERNARDINO-20-G1-GRXX-26”.

O. Seed Shipment: Seed shall be shipped in a manner that will prevent damage to the seed and arrive expeditiously at the BLM designated shipping location. The Contractor shall provide notification to BLM before the seed is shipped and shall

provide the tracking number of the package by email as soon as is practical. The COR shall provide the designated shipping address for the seeds.

P. Seed Delivery: All seed delivered shall conform to all laws and regulations pertaining to the shipment of seed required by the Federal Seed Act and the Seed laws pertaining to the representative state. Seed shall be shipped in a manner to prevent damage to the seed and minimize shipment time to no more than two days en route.

Q. Final Acceptance of all seed to be delivered under this contract shall be the responsibility of the Contracting Officer. Quality of the deliverables is subject to verification by the Contracting Officer's Representative (COR) with final payment to be withheld pending completion of any necessary rework by the Contractor. COR inspection and acceptance will occur within two weeks following receipt of seed. Final acceptance will be deemed to occur only after the COR has received a copy of all of the following at the specified delivery location:

- Favorable seed visual inspection
- Physical seed of the same favorable seed test lot
- Appropriate documentation of seed lot identification

1.4 DEFINITIONS

Container Production – Is a technique of sowing seed, germinating, and growing plants in cells or containers prior to transplanting into the field, usually in a controlled environment. The steps usually ensure increased levels of seed germination, plant growth and survival in the field.

Container production and transplant costs - is the vendor cost of container production in a greenhouse or shadehouse and the cost of transplanting the material to a field to meet the order. This cost is separate from the field maintenance costs and is usually a one-time cost.

Contracting Officer (CO) - an individual with the authority to enter into, administer, and/or terminate contracts and make related determinations and findings. The term includes certain authorized representatives of the contracting officer acting within the limits of their authority as delegated by the contracting officer.

Contracting Officer's Representative (COR) - an individual designated and authorized in writing by the Contracting Officer to perform specific technical or administrative functions.

Generation 1 (G1) – the first-generation seed produced after wild collection. G0 is wild collected seed; G1 is the seed produced from G0 plants, G2 is 2nd generation of seed, and so forth.

Isolation Distance - for stands of source-identified germplasm, an isolation distance is used to prevent another genetic strain of the species or other cross-pollinating species from breeding with the target germplasm.

International Seed Testing Association (ISTA) – is an international organization that develops unbiased and uniform seed testing methods and standards (https://www.seedtest.org/en/home.html). ISTA are accredited seed laboratories that meet uniform seed testing standards through the Accreditation, Proficiency Test and Auditing Programs. (https://www.seedtest.org/en/memberlaboratories.html).

Minimum Seed Lot Standards – are the minimum standards for viability, purity, moisture, other crop seed, weed seed and Pure Live Seed (PLS) for each seed lot of a species.

Native Grass and Forb Seed Accession – Is a collection of seed that represents a species germplasm from a specific area within the project area and a unique seed collection with a single identity and nomenclature.

Noxious Weeds (Federal and State) - is a combined list of prohibited or restricted weeds that occur on any of the federal or state noxious weed lists, in accordance with the Federal Noxious Weed Act of 1974, as amended (7 U.S.C. 2801 et seq.) and the Plant Protection Act (Pub.L. 106–224) in 2000, the Federal Seed Act 7 USC 1551-1611, and the individual States' Department of Agriculture seed laws and state prohibited and restricted noxious weed control and quarantine lists. Each State maintains official noxious weed lists for seed control and for quarantine of noxious weeds. The lists may be combined. The USDA Plants Database (https://plants.usda.gov/java/noxious) provides federal and state noxious weed lists. However, the most current state noxious weed list is posted at the individual States' Department of Agriculture web site.

Production costs and Maintenance - are the costs of production and field maintenance of the acreage identified and can be for one year or multiple years.

Project Inspector (PI) – is a designated subject matter individual working directly with the Contracting Officer's Representative. They have no authority to change the terms and conditions of the order or inspect/accept material.

Pre-Variety Germplasm (PVG) – is an AOSCA certification program for plant reproductive material development based upon verification of species and source to facilitate orderly procurement, production, and distribution of plant germplasm materials. Germplasm types include: (1) Source Identified Type (unevaluated germplasm identified only as to species and location of the wild growing parents); (2) Selected Type (germplasm showing promise of desirable traits, having been selected either within or as a common site comparison among accessions or populations of the same species); (3) Tested Type (germplasm for which progeny

testing has proven desirable traits to be heritable); finally (4) Variety/Cultivar release if eligibility requirements are satisfied. AOSCA certification standards for PVG materials are available at:
http://www.aosca.org/SiteContent/Documents///aoscanativeplantbrochure.pdf
http://seedcert.oregonstate.edu/sourceidentified.

NOTE: Since all seed lots under this contract are Source Identified germplasm, they are thus unrestricted natural accessions.

Pure Live Seed (PLS) – is the percent by weight of viable seed in a seed lot determined after germination and/or Tetrazolium (TZ) tests and purity analysis at a certified lab. PLS is calculated as follows for determining the percentage of Pure Live Seed (PLS).

(% PLS) the following formula shall be used: (% Purity) x (% Germination (TZ)) = % PLS

Seed Analysis Report – is an official seed quality report issued by the state certified seed-testing laboratory for a seed lot. The standard Purity, Germination, and TZ report includes seed viability and seed purity, including an all-states noxious weed exam. A Crop & Weed Report includes a list of all seed contaminants found in a bulk exam for the crop.

Seed Certifying Agency – is a state sanctioned service that develops standards and procedures for certifying crop seed in accordance with AOSCA guidelines.

Seed Cleaning - is a process where cleaning and de-bearding seeds by different methods to remove debris, straw material, weed and other undesirable seed and disease organisms (e.g. ergot, smut) and other contaminants.

Seed Quality Standards– are standards established for seed quality of each species that include 1) seed viability minimums, 2) inert matter maximums, 3) Pure Live Seed (PLS), (PLS) minimums, 4) other crop seed maximums, 5) weed seed maximums, 6) all-states noxious weed seeds, 7) prohibited and restricted weed seeds by individual states. Federal and State prohibited and restricted weed lists can be found at https://plants.usda.gov/java/noxiousDriver

Seed Viability – is the amount of live seed, including dormant seed as determined from a germination test or TZ test, whichever is greater. Either test result is acceptable. Seed dormancy is common in Mojave Desert native plant species, and standard protocols often do not exist for germination tests in these species. In these instances, the standard viability test is a TZ test.

Small Lots – is a field of less than one acre in size of a single species and unique germplasm, small lots could be 10 ft. in a row, a tenth acre plot, or 0.99 acres. These small lots are often used to make an initial G1 increase.

Source Identified (SI) Class – is the first step of the Pre-Variety Germplasm natural track. Unevaluated germplasm identified only to species with the location of the wild growing parents. Germplasm from a wildland stand with unrestricted representation of the intact wildland plant population on the original site. Genetic manipulation must be purposefully avoided when such accessions are increased in field or nursery production. NOTE: All seed lots under this contract shall be Source Identified Germplasm.

Transplant – is manually or mechanically planting container-grown plants in the field. It's a technique used for certain crops to improve the likelihood of survival and the rate of growth during plant development or to shorten the period until seed production.

Basis of Award. Pursuant to FAR 52.212-1(h), the Government may accept any item or group of quoted items. The Government will evaluate each line item separately and anticipates awarding multiple contracts resulting from this solicitation to the responsible offeror or offerors whose quote conforms to the solicitation and will be most advantageous to the Government, price and other factors considered.

Awards will be made based on evaluation of price and non-price factors. Non-price factors when combined, are significantly more important than price. The Government reserves the right to make award to a higher priced offer that offers less risk based on quote specifications and past performance.

Technical Evaluation

The Government will evaluate each line item's quoted amount of Government-Furnished seed required, and number of acres proposed to determine if the amounts are acceptable and reasonable to meet the Government's requirements.

Geographical Location

Field location will also be evaluated for geographic suitability. Preference will be given to proposed grow-out sites based on the following priority tiers:

1. Sites located within the Mojave Basin and Range Level III Ecoregion.
2. Sites located within the Sonoran Level III Ecoregion.
3. Sites located within the Southern California/Northern Baja Coast Level III Ecoregion OR sites within the Chihuahuan Deserts Level III Ecoregion
4. Sites located outside the above ecoregions.

Offerors shall clearly identify the proposed grow-out location(s) for Mojave seed increase items. Evaluation will consider alignment with these geographic priorities to support regional adaptation and restoration success.

Past Performance Evaluation

A past performance evaluation will be conducted for quoted line items that receive an acceptable technical rating.

An evaluation of past performance will consider successful execution of contracts similar in include scope.

The past performance evaluation may be based on information provided by quoters and other relevant past performance information available.

The Government will assess the relative performance risks associated with an offeror's record of past performance. Performance risks are those related to the likelihood of successful contract execution. The assessment of performance risk is not intended to be the product of a mechanical or mathematical analysis but rather a judgment by the Government after it considers all available and relevant information.

The Government will consider the recency and relevance of past performance information, source of the information, context of the data, and general trends in the offeror's performance. The lack of a relevant performance record will result in a neutral performance risk assessment, which will be used neither positively nor negatively.

Price Evaluation

Quoted prices will be evaluated to determine if a quoted price is fair and reasonable in accordance with FAR 13.106-3. This evaluation will consider quoted unit prices and total line-item price.

If the Contracting Officer determines there is not adequate price competition, then additional data (other than certified cost data) may be required.

Communications with Quoters

As set forth in FAR 52.212-1(g), the Government intends to evaluate quotes and award without communications with quoters. Quotes should contain best pricing.

52.212-4 Terms and Conditions—Commercial Products and Commercial Services. (RFO DEVIATION MAR 2026)

(a) *Definitions*. The clause at Federal Acquisition Regulation (FAR) 52.202-1, Definitions, is incorporated by reference.

(b) *Inspection/Acceptance*. The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The Government reserves the right to inspect or test any supplies or services that have been tendered for acceptance. The Government may require repair or replacement of nonconforming supplies or reperformance of nonconforming services at no increase in contract price. If repair/replacement or reperformance will not correct the defects or is not possible, the Government may seek an equitable price reduction or adequate consideration for acceptance of nonconforming supplies or services. The Government must exercise its post acceptance rights—

(1) Within a reasonable time after the defect was discovered or should have been discovered; and

(2) Before any substantial change occurs in the condition of the item, unless the change is due to the defect in

the item.

(c) *Assignment*. The Contractor or its assignee may assign its rights to receive payment due as a result of performance of this contract to a bank, trust company, or other financing institution, including any Federal lending agency in accordance with the Assignment of Claims Act (31 U.S.C. 3727). However, when a third party makes payment (*e.g.,* use of the Governmentwide commercial purchase card), the Contractor may not assign its rights to receive payment under this contract.

(d) *Changes*. Changes in the terms and conditions of this contract may be made only by written agreement of the parties.

(e) *Disputes*. This contract is subject to 41 U.S.C. chapter 71, Contract Disputes. Failure of the parties to this contract to reach agreement on any request for equitable adjustment, claim, appeal, or action arising under or relating to this contract shall be a dispute to be resolved in accordance with the clause FAR 52.233-1, Disputes, which is incorporated in this contract by reference. The Contractor shall proceed diligently with performance of this contract, pending final resolution of any dispute arising under the contract.

(f) *Excusable delays*. The Contractor shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of the Contractor and without its fault or negligence. Examples of occurrences include acts of God or the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. When an excusable delay occurs, the Contractor shall—

(1) Notify the Contracting Officer in writing as soon as possible;

(2) Remedy the delay as quickly as possible; and

(3) Notify the Contracting Officer when the occurrence is over.

(g) Invoice. The Government will handle invoices according to the Prompt Payment Act (31 U.S.C. 3903) and 5 CFR part 1315. The Contractor shall submit invoices to the address designated in the contract to receive invoices. An invoice must include the information required by 5 CFR part 1315.9(b).

(h) *Patent indemnity*. The Contractor shall indemnify the Government and its officers, employees, and agents against liability, including costs, for actual or alleged direct or contributory infringement of, or inducement to infringe, any United States or foreign patent, trademark, or copyright, arising out of the performance of this contract, provided the Contractor is reasonably notified of such claims and proceedings.

(i) *Payment*—

(1) *Items accepted*. Payment shall be made for items accepted by the Government that have been delivered to the delivery destinations set forth in this contract.

(2) *Prompt payment*. The Government will make payment in accordance with the Prompt Payment Act (31 U.S.C. 3903) and prompt payment regulations at 5 CFR part 1315.

(3) *Discount*. In connection with any discount offered for early payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been made on the date that appears on the payment check or the specified payment date if an electronic funds transfer payment is made.

(4) *Overpayments*. If the Contractor becomes aware of a duplicate contract financing or invoice payment or that the Government has otherwise overpaid on a contract financing or invoice payment, the Contractor shall—

(i) Remit the overpayment amount to the payment office cited in the contract along with a description of the overpayment including the—

(A) Circumstances of the overpayment (*e.g.*, duplicate payment, erroneous payment, liquidation errors, date(s) of overpayment);

(B) Affected contract number and delivery order number, if applicable;

(C) Affected line item or subline item, if applicable;

(D) Contractor point of contact; and

(ii) Provide a copy of the remittance and supporting documentation to the Contracting Officer.

(5) *Interest*.

(i) All amounts that become payable by the Contractor to the Government under this contract shall bear simple interest from the date due until paid unless paid within 30 days of becoming due. The interest rate shall be the interest rate established by the Secretary of the Treasury as provided in 41 U.S.C. 7109, which is applicable to the period in which the amount becomes due, as provided in (i)(6)(v) of this clause, and then at the rate applicable for each six-month period as fixed by the Secretary until the amount is paid.

(ii) The Government may issue a demand for payment to the Contractor upon finding a debt is due under the contract.

(iii) *Final decisions*. The Contracting Officer will issue a final decision as required by FAR part 33 if–

(A) The Contracting Officer and the Contractor are unable to reach agreement on the existence or amount of a debt within 30 days;

(B) The Contractor fails to liquidate a debt previously demanded by the Contracting Officer within the timeline specified in the demand for payment unless the amounts were not repaid because the Contractor has requested an installment payment agreement; or

(C) The Contractor requests a deferment of collection on a debt previously demanded by the Contracting Officer (see FAR part 32).

(iv) If a demand for payment was previously issued for the debt, the demand for payment included in the final decision shall identify the same due date as the original demand for payment.

(v) Amounts shall be due at the earliest of the following dates:

(A) The date fixed under this contract.

(B) The date of the first written demand for payment, including any demand for payment resulting from a termination for cause.

(vi) The interest charge shall be computed for the actual number of calendar days involved beginning on the due date and ending on-

(A) The date on which the designated office receives payment from the Contractor;

(B) The date of issuance of a Government check to the Contractor from which an amount otherwise payable has been withheld as a credit against the contract debt; or

(C) The date on which an amount withheld and applied to the contract debt would otherwise have become payable to the Contractor.

(vii) The interest charge made under this clause may be reduced under the procedures for interest credits prescribed in FAR part 32 in effect on the date of this contract.

(j) *Risk of loss*. Unless the contract specifically provides otherwise, risk of loss or damage to the supplies provided under this contract shall remain with the Contractor until, and shall pass to the Government upon—

(1) Delivery of the supplies to a carrier, if transportation is f.o.b. origin; or

(2) Delivery of the supplies to the Government at the destination specified in the contract, if transportation is f.o.b. destination.

(k) *Taxes*. The contract price includes all applicable Federal, State, and local taxes and duties.

(l) *Termination for the Government's convenience*. The Government reserves the right to terminate this

contract, or any part hereof, for its sole convenience. In the event of such termination, the Contractor shall immediately stop all work and shall immediately cause any and all of its suppliers and subcontractors to cease work. Subject to the terms of this contract, the Contractor shall be paid a percentage of the contract price reflecting the percentage of the work performed prior to the notice of termination, plus reasonable charges the Contractor can demonstrate to the satisfaction of the Government using its standard record keeping system, have resulted from the termination. The Contractor shall not be required to comply with the cost accounting standards or contract cost principles for this purpose. This paragraph does not give the Government any right to audit the Contractor's records. The Contractor shall not be paid for any work performed or costs incurred which reasonably could have been avoided.

(m) *Termination for cause*. The Government may terminate this contract, or any part hereof, for cause in the event of any default by the Contractor, or if the Contractor fails to comply with any contract terms and conditions, or fails to provide the Government, upon request, with adequate assurances of future performance. The Government will send a cure notice to the Contractor, unless the reason for the termination is late delivery. In the event of termination for cause, the Government shall not be liable to the Contractor for any amount for supplies or services not accepted, and the Contractor shall be liable to the Government for any and all rights and remedies provided by law. If it is determined that the Government improperly terminated this contract for default, such termination shall be deemed a termination for convenience.

(n) *Title*. Unless specified elsewhere in this contract, title to items furnished under this contract shall pass to the Government upon acceptance, regardless of when or where the Government takes physical possession.

(o) *Warranty*. The Contractor warrants and implies that the items delivered under this contract are merchantable and fit for use for the particular purpose described in this contract.

(p) *Limitation of liability*. Except as otherwise provided by an express warranty, the Contractor will not be liable to the Government for consequential damages resulting from any defect or deficiencies in accepted items.

(q) *Compliance with laws unique to Government contracts*. The Contractor agrees to comply with 31 U.S.C. 1352 relating to limitations on the use of appropriated funds to influence certain Federal contracts; 40 U.S.C. chapter 37, Contract Work Hours and Safety Standards; 41 U.S.C. chapter 87, Kickbacks; 49 U.S.C. 40118, Government-financed air transportation; and 41 U.S.C. chapter 21 relating to procurement integrity.

(r) *Order of precedence*. Any inconsistencies in this solicitation or contract shall be resolved by giving precedence in the following order:

(1) The schedule of supplies/services;

(2) The Disputes, Payments, Invoice, Compliance with Laws Unique to Government Contracts, and Unauthorized Obligations paragraphs of this clause;

(3) Other contract clauses incorporated in the solicitation or contract;

(4) Addenda to this solicitation or contract;

(5) Solicitation provisions incorporated in the solicitation;

(6) Other paragraphs of this clause;

(7) Other documents, exhibits, and attachments; and

(8) The specification.

(s) *Unauthorized obligations*.

(1) Except as stated in paragraph (s)(2) of this clause, when any supply or service acquired under this contract is subject to any End User License Agreement (EULA), Terms of Service (TOS), or similar legal instrument or agreement, that includes any clause requiring the Government to indemnify the Contractor or any person or entity for damages, costs, fees, or any other loss or liability that would create an Anti-Deficiency Act violation (31 U.S.C. 1341), the following shall govern:

(i) Any such clause is unenforceable against the Government.

(ii) Neither the Government nor any Government-authorized end user shall be deemed to have agreed to such clause by virtue of it appearing in the EULA, TOS, or similar legal instrument or agreement. If the EULA, TOS, or similar legal instrument or agreement is invoked through an "I agree" click box or other comparable mechanism (e.g., "click-wrap" or "browse-wrap" agreements), execution does not bind the Government or any Government authorized end user to such clause.

(iii) Any such clause is deemed to be stricken from the EULA, TOS, or similar legal instrument or agreement.

(2) Paragraph (s)(1) of this clause does not apply to indemnification by the Government that is expressly authorized by statute and specifically authorized under applicable agency regulations and procedures.

(t) *Comptroller General examination of record*. This paragraph applies if this contract was awarded using other than sealed bid procedures and is in excess of the simplified acquisition threshold on the date of award of this contract.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices, at all reasonable times, the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR part 4, longer period required by statute, or periods specified in other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This clause does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(u) *Incorporation by reference*. The Contractor's representations and certifications, including those completed electronically via the System for Award Management (SAM), are incorporated by reference into the contract.

(4) □ Have, □ have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds the threshold at 9.104-5(a)(2) for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) *The tax liability is finally determined*. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) *The taxpayer is delinquent in making payment*. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) *Examples*.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. §6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. §6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

Notice to Contractors - CPARS (DEC 2015)

Contractor Performance Assessment Reporting System (December 2015)

1) FAR 42.1502 directs all Federal agencies to collect past performance information on contracts. The Department of the Interior (DOI) has implemented the Contractor Performance Assessment Reporting System (CPARS) to comply with this regulation. One or more past performance evaluations will be conducted in order to record your contract performance as required by FAR 42.15.
2) The past performance evaluation process is a totally paperless process using CPARS. CPARS is a web- based system that allows for electronic processing of the performance evaluation report. Once the report is processed, it is available in the Past Performance Information Retrieval System (PPIRS) for Government use in evaluating past performance as part of a source selection action.
3) We request that you furnish the Contracting Officer (CO) with the name, position title, phone number, and email address for each person designated to have access to your firm's past performance evaluation(s) for the contract no later than 30 days after award. Each person granted access will have the ability to provide comments in the Contractor portion of the report and state whether or not the Contractor agrees with the evaluation, before returning the report to the Assessing Official (AO). Information in the report must be protected as source selection sensitive information not releasable to the public.
4) When your Contractor Representative(s) are registered in CPARS, they will receive an automatically generated email with detailed login instructions. Further details, systems requirements, and training information for CPARS is available at https://www.cpars.gov/.
5) Within 60 days after the end of a performance period, the AO will complete an interim or final past performance evaluation, and the report will be accessible at https://www.cpars.gov/.

a) Contractor Representatives may then provide comments in response to the 6.evaluation, or return the evaluation without comment.
b) Your comments should focus on objective facts in the AO's narrative and should a)provide your views on the causes and ramifications of the assessed performance.
c) All information provided should be reviewed for accuracy prior to submission.
d) If you elect not to provide comments, please acknowledge receipt of the evaluation by indicating "No comment" in the space provided, and then selecting "Accept the Ratings and Close the Evaluation".

e) Your response is due within 60 calendar days after receipt of the CPAR. On day 15, the evaluation will become available in PPIRS-RC marked as "Pending" with or without comments and whether or not it has been closed.
f) If you do not sign and submit the CPAR within 60 days, it will automatically be returned to the Government and will be annotated: "The report was delivered/received by the contractor on (date). The contractor neither signed nor offered comment in response to this assessment."
6) The following guidelines apply concerning your use of the past performance evaluation:
a) Protect the evaluation as source selection information. After review, transmit the evaluation by completing and submitting the form through CPARS. If for some reason you are unable to view and/or submit the form through CPARS, contact the CO for instructions.
b) Strictly control access to the evaluation within your organization. Ensure the evaluation is never released to persons or entities outside of your control.
c) Prohibit the use of or reference to evaluation data for advertising, promotional material, pre-award surveys, responsibility determinations, production readiness reviews, or other similar purposes.
7) If you wish to discuss a past performance evaluation, you should request a meeting in writing to the CO no later than seven days following your receipt of the evaluation. The meeting will be held in person or via telephone or other means during your 60-day review period.
8) A copy of the completed past performance evaluation will be available in CPARS for your viewing and for Government use supporting source selection actions after it has been finalized.
