Section B: Description of the Supplies/Services Required

The Bombardier Flight Deck 3 is a flight application that is designed to allow pilots to have all of the necessary flight documentation and technical orders at the touch of a button. No other solution combines automatic Temporary Revision (TR) updates, user control of content and aircraft serial number-specific information into one application.

Section C: Justification for Soliciting from a Single Source or Brand Name

Bombardier Flight Deck 3 provides pilots a centralized location to access all their flight documents, technical orders, and aircraft manuals. Furthermore, the Bombardier Flight Deck 3 is the application that is currently being utilized in the remaining E-11 fleets both domestically and down range. Continuity is imperative for mission success to ensure pilot familiarity. Bombardier Flight deck has all the publications needed to fly the aircraft and calculate takeoff and landing data and weight and balance data. The Bombardier Flight Deck application also includes all required FAA, EASA and TC compliant audit trails for paperless operations. The application provides pilots with the capability to simply enter a license code, sync and the updated documents are automatically downloaded and cataloged. In less time than it takes to send a fax, pilot scan sign documents, add text and email it to the fleet manager. Bombardier is the only application with proper authorization and clearance for E-11 operation groups to utilize.

Section D: Efforts to Obtain Competition

Contracting officer performed market research via Internet searchers and speaking with subject matter experts about comparable application capabilities.

Section E: Steps to Preclude Future Single Source or Brand Name Awards

There are no actions that the Government can take to remove or overcome barriers to award this contract by competitive procedures.
