Questions and Answers
RFQ 36C25926Q0712

Question 1: If annual fuel testing identifies that multiple fuel tanks require cleaning/polishing, will the Government schedule remediation for those tanks sporadically (i.e., as separate task orders/visits spread over time), or will remediation for multiple tanks be grouped into a single site visit?

Answer 1: All remediation for a given year will be scheduled into a single site visit. It does not need to be completed within the same day, as in, the contractor has the option to perform the work over multiple days.
