509FSSNeoverse System
Salient Characteristics
8 August 2025

The government requires the delivery and installation of an interactive and immersive bowling entertainment system designed to transform bowling centers into multidimensional entertainment venues over 16 lanes. It should include an LED video wall, synchronized lighting effects, that interact with the scoring and other events on the lane to create a “living environment” for bowlers. This system shall have the following characteristics:

1. 56’ L x 7’ H LED Wall to cover 16 bowling lanes
2. Synchronized lighting effects that interact with displays
3. Cannot exceed 100v power supply requirement
4. Must be integrate directly into already existing Qubica Hyperbowling bumper systems and machinery installed in 2024
5. Must be Qubica brand for proper integration and system function

DELIVERY:
Delivery and Installation of above item will be coordinated with WAFB Bowling Management personnel.

TRAINING:
Must include training for all bowling staff on usage and training for bowling alley maintenance tech on set up and maintenance
