Project Rehab Comfort Stations A & B for ABA Access	By Galloway	Checked	
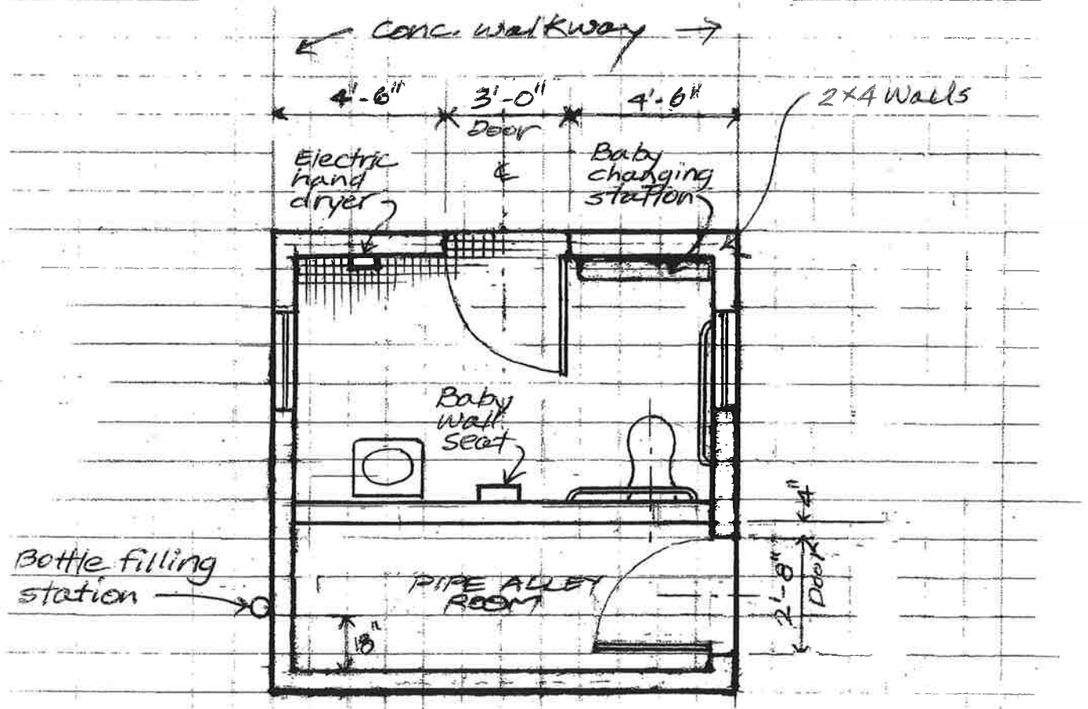
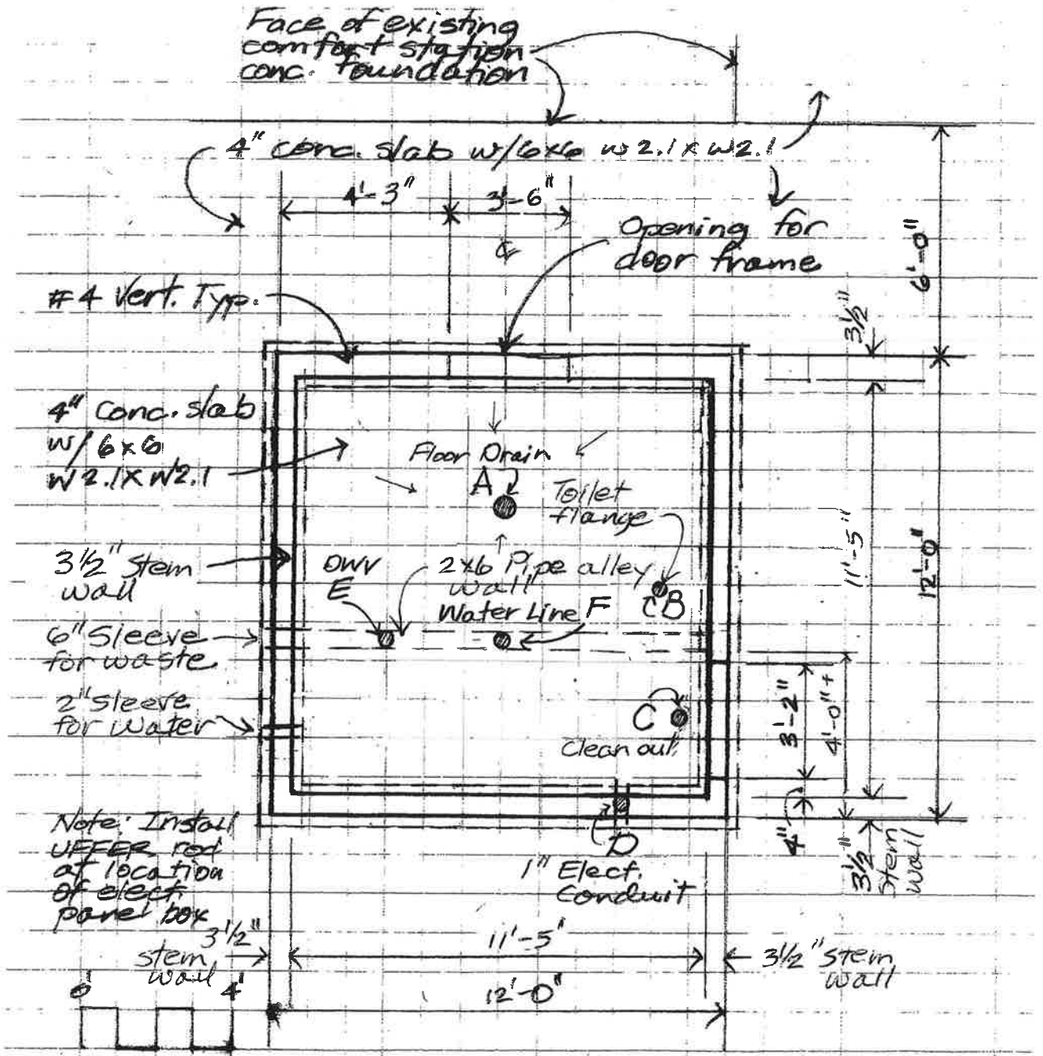
Feature Comfort Station A Grading Plan	Date 1/14/2025	Date	

Note: Openings in foundation subject to adjustment.



FLOOR PLAN

Note:
The Floor Plan is for information only and is not in the Contract.



FOUNDATION PLAN

See Notes on next Sheet

	NATIONAL PARK SERVICE OLYMPIC NATIONAL PARK		Sheet 9 of
Area Fairholme Campground			Pkg.
Project Rehab Comfort Stations A & B for ABA Access	By Galloway	Checked	Account
Feature Family Restroom Floor Plan & Foundation Plan	Date 1/14/2025	Date	

Notes for Sheet 9

A. Install floor drain to manufacturers specifications for a concrete slab that will be finished in tile. Connect trap primer to 1/2" pex and stub up into pipe alley wall. Basis of design: Sioux Chief, Adjustable On-Grade Floor Drain, Item number 832-25ANQ 2" ABS Hub -5-7/8" Sqr Niki-Brnz Ring & Strainer or approved equal.

B. Set center of toilet flange 19" off rough framing of the side wall and 13" off rough framing of pipe alley wall. Set height to manufacturers specifications for a concrete slab that will have a finished floor of tile. Basis of Design: Sioux Chief 884-ATM 3" Hub/Inside 4", ABS, Flush to Floor, 2 1/2" Tailpiece or approved equal.

C. Install 3" adjustable hub clean out to manufacturer's specifications for an unfinished concrete slab. Set with 8" of separation between the drain and the inside of the door framing. Basis of Design: Sioux Chief 834-3ANR 3" Hub -6 1/2" Rnd Niki-Brnz Ring and cover or approved equal.

D. Run 1" electrical conduit from outside main comfort station pipe alley to inside back stem wall of the pipe alley. Stub up and cap at 48" at both locations. For Comfort Station A, stub up conduit on west side of pipe alley door at existing comfort station. For ComfOrt Sta B, stub up conduit on load side of meter main panel at existing comfort station. Note: Install Ufer ground rod in the foundation for panel.

E. Stub up 3" ABS DWV 24" above the concrete slab and cap. Locate stub up 30" from side wall closest to sink in the pipe alley wall.

F. Stub 1" Pex up into center of the pipe alley wall for water supply and cap. Connect water supply lines to supply lines in pipe alley of existing comfort station with 1" brass ball valve.

G. Grade slab to floor drain per manufacturers specifications.

H. Contractor is responsible for all locates, trenching, running of waste and water lines, connections, backfill, and testing to hook water and sewer up for above mentioned items. For electrical conduit, the contractor is responsible for locates, trenching, running conduit, and backfill. Olympic National Park (ONP) staff will pull wire and make electrical connections at a later date.

I. Provide COR at least 72 hours notice before pouring stem wall for ONP carpenter to verify J Bolt locations and 72 hours notice before pouring slab so ONP personnel can verify all completed rough in plumbing locations.

General Notes

1. Contractor shall provide layout and grade staking for review and approval of Contracting Officer.

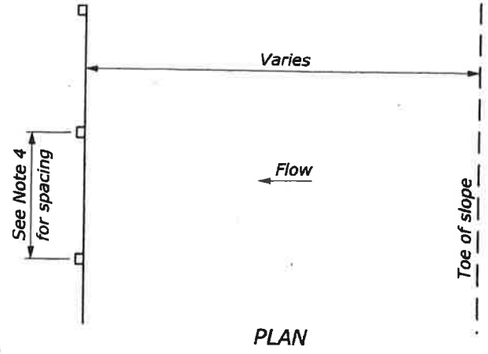
POST AND GEOTEXTILE INSTALLATION DETAIL



PLAN

NOTE:

1. Alternate preassembled silt fence options will be allowed as long as specified dimensions are satisfied. Follow manufacturer's recommendations for installation procedures. All types must ensure silt fence remains attached to, and does not slide down, supporting posts.
2. Install silt fence to follow the ground contours as closely as possible.
3. Curve ends of silt fence upgrade to prevent water from running around the ends.
4. 10-foot (max.) spacing with silt fence reinforcement. 6-foot (max.) spacing without silt fence reinforcement.
