SECTION SF 30 BLOCK 14 CONTINUATION PAGE

SUMMARY OF CHANGES

Block 14 (Description of Amendment/Modification): The purpose of this amendment is to:

Reopen the solicitation for thirty (30) calendar days with a close date and time of 03-Sep-2026 10:00 AM JST.

To also provide further clarification:

1. Please bid on the work only to be accomplished at your facility. Transportation of the craft to and from your facility will be covered separately by the government.

2. POP for the work is open and can be proposed by KTR based on their available resources.

3. The criteria for contractor utilization of Mechanically Attached Fittings (MAF) are governed by NSI 009-095 (a Category II NSI), which must be referenced within the work specification. To facilitate timely contract solicitations and preserve the ship's availability schedule, current work specifications are written to invoke only NSI 009-012 (Weld, Fabricate, and Inspect; accomplish). Post-award, the contractor may submit a Condition Found Report (CFR) requesting to implement NSI 009-095, subject to approval by the SUPERVISOR. Following CFR approval, the contractor must submit a written MAF procedure that meets the criteria of NSI 009-095 (paragraph 3.2.1) and MIL-STD 777 (Schedule of Piping Systems, Valves, Fittings, and Associated Piping Components for Naval Surface Ships). This procedure must be submitted to the SUPERVISOR for review and approval a minimum of 7 days prior to the start of the first installation. Utilizing the CFR process for this transition ensures administrative efficiency; revising active, executable work specifications during the solicitation phase to cover every potential engineering permutation is inefficient and counterproductive to SRF-JRMC Detachment Sasebo's procurement timelines."

Q&A:

1. Since we do not possess the Welding Procedure Specification (WPS) for thicknesses under 0.1875 inches, we would like to propose an alternative mechanical joining method. Could you please clarify if the Government would accept the use of Lokring (lock ring) fittings or other equivalent mechanical coupling methods as an alternative to welding for this specific item.

A: The use of Mechanically Attached Fittings (MAFs) is a possibility for this requirement. Any proposed use of alternative mechanical coupling methods must be compliant with NAVSEA Standard Item (NSI) 009-95 (Mechanically Attached Fitting; install) and referenced standards. Offerors proposing this alternative must clearly detail their technical approach, including compliance with NSI 009-95 and the specific MAF process to be utilized--within their technical proposal for Government evaluation and subsequent Quality Assurance (QA) program review.
