[redacted]

Job Name: Ft. Leavenworth Ground Bonding Resistance Testing
Contract # W91QF4-21-P-0023
Site Location/Address: Ft. Leavenworth, KS 66027
Scope Of Work: Perform bonding resistance measurements between air terminals and roof conductors or downleads.

2.12 Bldg 1156 - 840 Sabalu Rd 206

2.13 Bldg 1157 - 844 Sabalu Rd..... 227

1 Introduction

• Many loose air terminals, loose clamps, and missing fasteners were observed. Some terminals provided resistance measurements and some were open circuited. Open circuited terminals are marked as such in the measurement tables.

• Every attempt was made at maintaining due diligence.

• Fort Leavenworth was visited to make measurements: from Monday, March 28th, 2022 through Friday, April 1, 2022, and on Monday, April 25 and Tuesday, April 26, 2022.

• We experienced inclement weather throughout most of the initial trip.

• On the second trip, our staff had to deploy tractor cones to keep cars from blocking the area(s) where the boom lift needed to operate.

Nomenclature:

- Numeric value “0.343”, etc. = meter reading, in units of milli-ohms.
- “NO AT” = No air terminal present at the indicated location.
- “OPEN” = open circuit, no measured continuity.

2 Locations

2.1 Bldg 52 - 415 Sherman Ave
