Lange WPA Tree Project
Acres Covered: 80 acres

Description: cutting and piling scattered trees in the upland portion of Lange WPA, trees need to be cut a ground level and the stumps need to be chemically treated (except cedar). Size varies from small trees to larger trees, but the majority are small and medium in size. Any part of the project area that is next to the raod includes trees in the ROW.

Can ignore: dogwood, sumac and plum shrubs, and trees growing into the barbed wire of the boundary fence line.

Tree piles must be at least 100 yards from the fence line.
