**Addendum #1 to RFQ 10213978
For
C-Cure Access Control Systems**

August 18, 2026

DWR received three (3) questions for RFQ 10213978 for C-Cure Access Control System Services.

Q1: Will DWR accept a bidder holding a current C-7 Low Voltage Systems license, without a C-28, provided the bidder's proposed scope of work is limited to the electronic access control maintenance, software support, and low-voltage systems service described in Exhibit A?

A1: A C-28 license is required for some projects throughout the contract. Either the prime contractor or a documented Sub-contractor must have the C-28 license as part of the bid packet.

Q2: Alternatively, will DWR accept a prime bidder holding a C-7 license who identifies a C-28-licensed subcontractor to perform any specific task that falls within C-28's scope, consistent with the subcontractor identification requirements of Attachment 7 (Bidder Declaration, GSPD-05-105)?

A2: Yes, a subcontractor with a C-28 license that is identified in the Bidder's Declaration is acceptable. Please be sure to include a copy of the valid C-28 license with the bid response.

Q3: If DWR intends to retain the C-28 requirement as written, can DWR confirm the specific basis for requiring it given the maintenance-only nature of this SOW, so that bidders can appropriately staff or team for compliance?

A3: The C-28 license is needed to work on the electric strikes and locks that interact with the access control systems through DWR buildings in Sacramento. While we will not be doing any wiring of new systems for new locks, the ability to repair and replace broken or malfunctioning locks is paramount to this contract.

Thank you,

Nicole Anderson
