RFP 25NS0665 – Addendum 2

Below is a question received with answer provided in **Bold** font.

1. In the "Deliverable_Cost_Sheet" tab, for Task 18: Field Verification, Development Monitoring and Technical Testing, a quantity of 27,000 is listed under the "Amount Required" for the initial three-year term. This quantity is associated with the following line items:
 - Deliverable 18.1: On-site Inspections
 - Deliverable 18.2: Site visit summaries

The RFP's Scope of Work (Deliverable 18.1) indicates that the contractor will perform annual onsite inspections for standard-monitoring subgrantees and more frequent visits for higher-risk ones. With an estimated 84 projects and approximately 270,000 locations to be served, we are seeking to understand the basis for the 27,000 figure.

Could you please provide clarity on what the "Amount Required" of 27,000 represents? For example, does this number signify the total number of locations (BSL) to be inspected?

A: The numeric values present in the cost worksheet for Task 18, On-site Inspections and Site Visit Summaries, are estimations only. The estimations are based on broadband serviceable locations (BSLs), potential risk assessments, and annual site visits.
